Coding Quiz 2

COMP9021 PRINCIPLES OF PROGRAMMING
Term 3, 2021

Reading the number written in base 8 from right to left, keeping the leading 0's, if any:

0: Move North
1: Move North-East
2: Move East
3: Move South-East
4: Move South
5: Move South West
6: Move West
7: Move North-West

We start from a position that is the unique position where the switch is on.
Moving to a position switches on to off, off to on there.

$ python3 quiz_2.py
Enter a non-strictly negative integer: 0
Keeping leading 0's, if any, in base 8, 0 reads as 0.
